PROFESSIONAL SUMMARY

Skilled in creating responsive Web & mobile interfaces using React.js, Next.js, TypeScript & Tailwind CSS. Went through an internship experience that involved shipping reusable UI components and integrating Swagger-documented REST APIs and ships full stack side projects on Node.js, Prisma ORM, and PostgreSQL, using JWT auth, role-based access, payment integration.

SKILLS

- **Frontend:** React.js, Next.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, shadcn/ui, Responsive Web Design
- **Backend & Database:** Node.js, Hono, REST APIs, JWT Authentication, PostgreSQL, Prisma ORM
- **Tools & Platforms:** Git, GitHub, VS Code, Swagger, Expo, Vercel
- **Concepts:** Component-Based Architecture, State Management, API Integration, Debugging, Version Control

INTERNSHIP EXPERIENCE

- **Frontend Development Intern** May 2025 – Jul 2025
Riddhasoft Pvt. Ltd., Kathmandu
 - Shipped 15+ reusable React components (forms, tables, modals, filters) used across 3 internal modules, working from design handoffs to functional interfaces
 - Integrated 20+ Swagger-documented REST endpoints and standardized loading, empty, and error states so screens degraded predictably on slow or failing requests
 - Identified a date-format mismatch between the API response and the UI date library during integration, and agreed a contract change with the backend team instead of patching it in the component layer
 - Resolved cross-browser layout inconsistencies in shared components, improving rendering consistency across Chrome, Firefox, and Safari

PROJECTS

- **Evently – Event Planner Mobile App** GitHub
Expo, React Native, TypeScript, Hono, Prisma, PostgreSQL
 - Mobile app for booking Nepali ceremony services (weddings, Bartabandh, Nwaran/Pasni) with separate client, vendor, and admin flows behind JWT authentication and role-based access control
 - Handled Khalti checkout end to end, including the server-side verification callback that confirms payment before a booking is marked paid
 - Added an AI planning assistant that drafts event checklists and budget splits, routing across Gemini, Cohere, and Groq
- **Developer Toolbox** GitHub | Live Demo
Next.js, React, TypeScript, Tailwind CSS, shadcn/ui
 - Seven utilities (JSON, URL, Base64, UUID, regex, JWT, hashing) under one searchable dashboard, all processing in-browser so no input is uploaded; JWT tool labeled decode-only in the UI since it does not verify signatures
- **JSON Package Analyzer** GitHub | Live Demo
Next.js, React, TypeScript, Tailwind CSS, Framer Motion
 - Drag-and-drop tool splitting a package.json into dependencies and devDependencies with counts and version-range types, then exporting the summary; parsing runs client-side with no backend
- **GitHub README Designer** GitHub | Live Demo
Next.js, React, TypeScript, Tailwind CSS, React Markdown
 - Guided form that assembles a GitHub README section by section, with a live markdown preview rendered through React Markdown and an editable output pane before copy or download

EDUCATION

- **BCA**, Citizen College – CGPA 3.60, 2026
- **NEB**, Radiant Secondary School – GPA 2.37, 2021
- **SEE**, West Point English Boarding School – GPA 3.30, 2019

CERTIFICATIONS & LANGUAGES

- **Certifications:** Introduction to Model Context Protocol (Anthropic) | Foundations of Prompt Engineering (AWS)
- **Languages:** English, Nepali, Hindi
